HR Attrition Analysis Dashboard

Prepared By _: Poojitha M
Date : January 2026
Version : 1.0

PROJECT OVERVIEW

Employee attrition is a major challenge for organizations as it impacts productivity, increases recruitment costs, and leads to loss of experienced employees. The Human Resources (HR) department requires a data-driven solution to monitor attrition trends and identify key factors influencing employee turnover.

This project aims to analyze employee attrition patterns and provide meaningful insights through an interactive Power BI dashboard.

1. BUSINESS PROBLEM

The organization is experiencing employee attrition across various departments. HR stakeholders currently lack a centralized view to analyze attrition trends and understand the factors contributing to employee turnover.

Without proper analysis, it becomes difficult to identify departments with high attrition, understand employee satisfaction levels, and evaluate the impact of overtime on workforce retention.

2. BUSINESS OBJECTIVE

The objective of this project is to analyze employee attrition patterns and identify key factors contributing to employee turnover.

The dashboard is designed to help HR Stakeholders:

Monitor overall attrition levels.

Identify departments with high attrition.

Analyze the impact of overtime on employee retention.

Understand the relationship between job satisfaction and attrition.

Evaluate attrition trends based on employee tenure.

3.STAKEHOLDERS.

Stake holder purpose.

HR manager monitor attrition and retention metrics HR Team Analyze employee turnover patterns.

Department heads understand department level activation senior management support strategic workforce decisions

4. BUSINESS GOALS.

The project aims to:

Reduce employee attrition.

Improve employee retention.

Support workforce planning.

Improve employee satisfaction.

Enable data-driven HR decision-making.

5.KEY PERFORMANCE INDICATORS (KPIs).

The dashboard includes the following KPIs:

Total Employees

Attrition Count

Attrition Rate (%)

Average monthly Income.

Average years at Company

6.BUSINESS QUESTIONS.

The project is designed to answer the following questions.

1. What is the current employee attrition rate?
2. Which department experiences the highest attrition?
3. How does overtime influence employee attrition?

4. What is the relationship between job satisfaction and attrition?
5. How does attrition vary across employee tenure?
6. What insights can help HR improve retention strategies?

7. PROJECT SCOPE.

In Scope.

Department-wise attrition analysis.

Overtime analysis.

Job satisfaction analysis.

Employee tenure analysis.

KPI monitoring.

Interactive filtering using slicer.

Out of scope.

Recruitment Analytics.

Payroll Analytics.

Employee performance evaluation.

Promotion and compensation analysis

8. EXPECTED BENEFITS

The dashboard is expected to provide following benefits:

Better understanding of following trends

Identification of departments with high turnover.

Improved workforce planning.

Support for employee retention initiatives.

Data-driven decision-making for HR teams.

9. ASSUMPTIONS

Employee data is accurate and complete.

Attrition records are correctly maintained.

Dashboard users have basic knowledge of HR metrics.

The dataset used represents employee attrition patterns accurately.

10. KEY INSIGHTS

Based on the analysis:

The Sales department has the highest attrition rate.

Employees working overtime show significantly higher attrition compared to employees not working overtime.

Lower job satisfaction levels are associated with higher employee turnover.

Employee tenure has a noticeable impact on attrition patterns.

11. CONCLUSION

The HR Attrition Analysis Dashboard provides a centralized view of employee attrition trends and key workforce metrics. The insights generated through this dashboard can help HR teams identify retention challenges and support strategic workforce planning initiatives.
